Testmoz

Module IV

Dr. Lolly Jain

Vice-Principal and Associate Professor in Microbiology

K.J.Somaiya College of Science and Commerce,

(Autonomous-Affiliated to University of Mumbai)

Vidyavihar, Mumbai

Objectives

At the end of the module, the learner will be able to:

- ❑ Explain how Testmoz can be used for in-class assessments
- ❑ Describe how Testmoz can be used for out-of-class assessments

*Testmoz for
In-class Assessments*

Significance of Testmoz

ICT tools like Testmoz in teaching help to speed up the assessment process

It helps to gauge the learner understanding

Instructors find it easier to use ICT tools like Testmoz for Formative assessment

Significance of Testmoz

Instructors find it easy to take as many online tests as needed for the topic compared to paper-pen tests

Assessments can be planned in well in advance before meeting the learners

Testmoz can be used for both in-class and out-of-class assessments

Use of Testmoz for In-class Assessments

Instructors can check the understanding of learners about a particular topic for which reading material has been shared prior to the class.

Example

Assessment prepared before class and administered in-class

Recombinant DNA
Technology

Create a
quiz

Give the link and
password to learners

Use of Testmoz for In-class Assessments

The test can be used after discussing the topic in the class once again to ensure the achievement of basic two levels of Blooms Taxonomy.

Once a particular module is completed, a quick Quiz on Testmoz can give the instructor a fair idea about 'How much' and 'What' has been transferred to the learner.

*Testmoz for
Out-of-class Assessments*

Use of Testmoz for Out-of-class Assessments

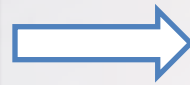

The Quiz can be taken as an out-of-class activity after the learner has read and understood a particular module.

Online Assessment administered after a topic has been covered in-class

Topic covered
in class

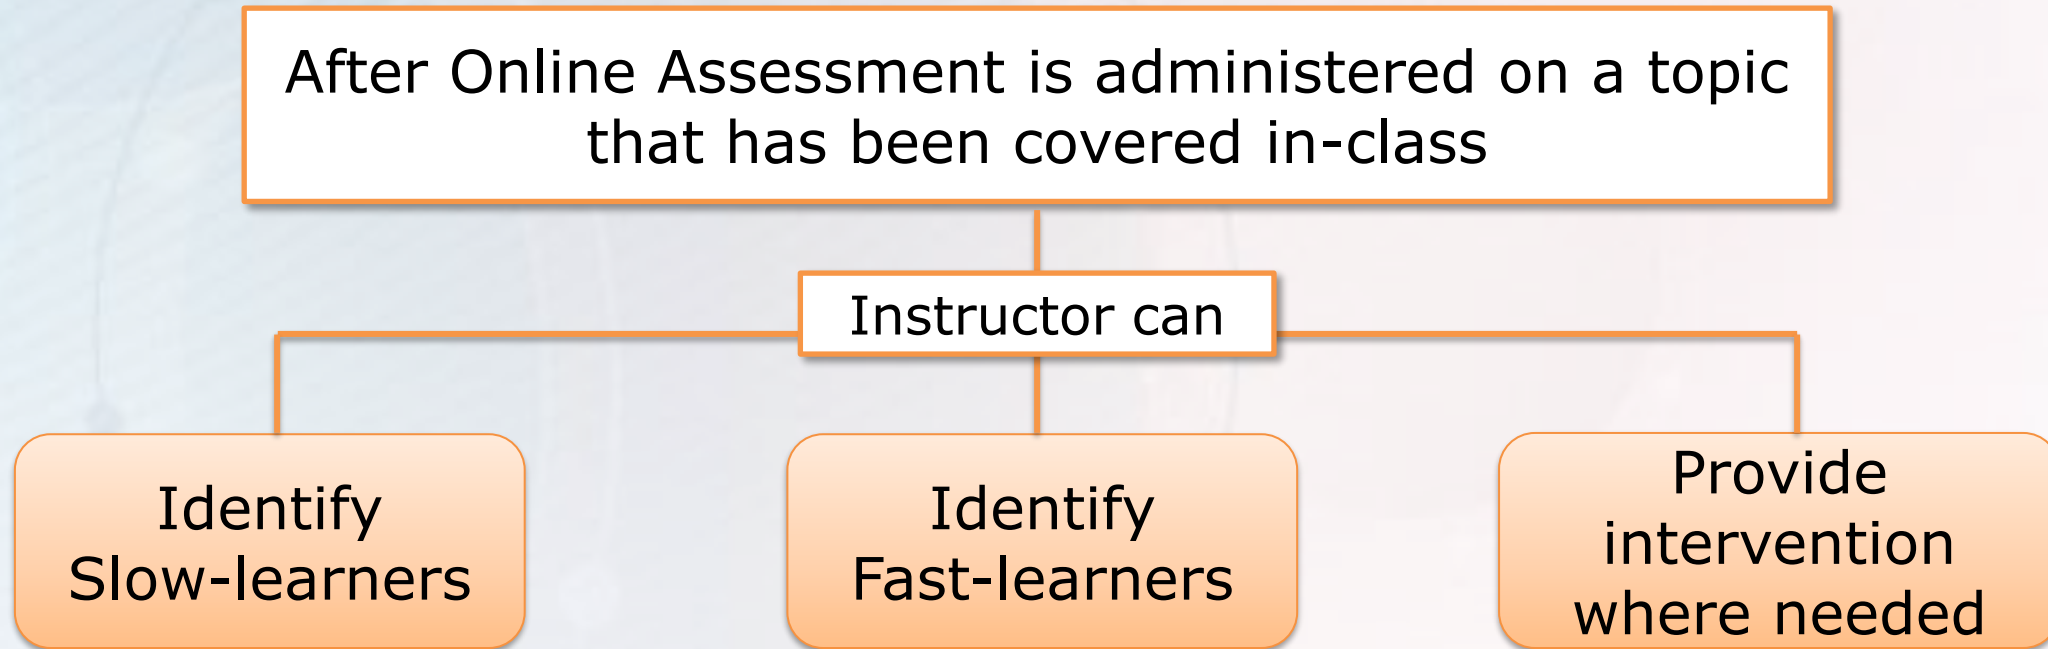

Create
a quiz

Learners use link and password
of the quiz to attempt it online

Use of Testmoz for Out-of-class Assessments

It allows the instructor to know which questions have been correctly and wrongly attempted by maximum number of learners indicating the need for revisiting that topic.

Summary

Developing and administering assessments in Testmoz –

- can be planned in well in advance before meeting the learners
- helps to gauge the learner understanding
- Helps in identifying gaps in learning and aids interventional teaching
